

VISMAYA PRABHAKAR

Kerala, India | Ph: 9778213292 | vismayaprabhakar1@gmail.com | [LinkedIn](#) | [Github](#)

PROFILE

Highly adaptable and motivated software developer with a strong foundation in C++, Java gained through hands-on training at UST. Quick to learn new technologies and apply problem-solving skills to real-world challenges. Dedicated to writing clean, efficient code and continuously improving both technical and collaborative abilities. Eager to contribute to impactful projects and deliver high-quality, reliable software solutions.

WORK EXPERIENCE

Developer I – Software Engineering UST | Applied Materials Account

Chennai, Tamil Nadu
March 2025 – October 2025

- Undergone professional C++, Java training that covers foundational concepts, advanced techniques, and industry best practices.
- Through a combination of theoretical lessons and hands-on projects, I have gained proficiency in areas such as object-oriented programming, memory management, concurrency, and template programming.
- Practiced applying my skills and knowledge by tackling unique and scenario-based problem statements.

Associate I – Production Support Engineer UST | Muthoot Account

Trivandrum, Kerala
November 2025 – Present

- Provided production support by monitoring applications, troubleshooting incidents, and ensuring timely issue resolution while meeting SLA commitments.
- Collaborated with cross-functional teams to analyze root causes, resolve production issues, and maintain application stability and availability.
- Managed incident tickets, performed application health checks, and documented resolutions to support smooth business operations and continuous service improvement.

EDUCATION

COLLEGE OF ENGINEERING THALASSERY

Bachelor of Technology in Computer Science and Engineering
Cumulative GPA: 8.12/10.0

Kannur, Kerala
July 2020- July 2024

RAJEEV GANDHI MEMORIAL H S S

Class 12[Bio-Maths]
Percentage : 94.83%

Kannur, Kerala
July 2018- July 2020

PROJECTS

OPERATING SYSTEM TO SUPPORT 64-BIT GW-BASIC [UST training project]

- Developed the **bootloader** responsible for loading the custom 64-bit Operating System into memory and initiating execution.
- Wrote low-level assembly code to initialize system hardware, switch to 64-bit long mode, and transfer control to the OS kernel.
- Ensured compatibility with virtual machines (QEMU/VirtualBox).
- Gained hands-on experience in system-level programming and the OS boot process.
- **Technologies used:** NASM, x86_64 Assembly, QEMU, VirtualBox

HEALTH CARE CLAIMS FRAUD DETECTION SYSTEM

- Designed and developed a microservices-based application using FastAPI, PostgreSQL, Redis, and Docker.
- Built RESTful APIs with request validation (Pydantic), error handling, and OpenAPI documentation
- Implemented real-time data processing pipeline using Redis for asynchronous task handling.
- Developed ML-based fraud detection models (Autoencoder, Isolation Forest) for anomaly detection
- Performed data preprocessing and feature engineering using Pandas and NumPy
- Created interactive dashboard using Streamlit and Plotly for monitoring fraud insights
- Wrote unit and API tests using Pytest and implemented service health checks

MIND MENTOR – AI BASED MENTAL HEALTH THERAPIST CHATBOT

- The platform offers support to individuals who are seeking mental support, personalized support with the help of AI chatbot.
- The platform connects users with qualified mental health professionals.
- Backend server is done using Flask(Python Framework),MySQL Database and NLP framework.

TECHNICAL SKILLS

Languages: C/C++, Python, SQL, Java , HTML/CSS

Tools: Windows, Linux, Git, Visual Studio, Eclipse, GNU compilers.

Other: Data Structures and Algorithms

COURSES AND CERTIFICATION

AI WITH PYTHON

By Hope Foundation, Bangalore.

PYTHON CERTIFICATION

Gama Training, UST

WORKSHOPS

- Cyber Security and Ethical Hacking Workshop- 2022
- IEDC Workshop on Natural Language Processing- 2022

LANGUAGES

- English
- Hindi
- Malayalam
- Tamil
